## NOTICE TO HUNTERS

» Hunters may encounter locked gates that prevent access to certain areas. Most gates have been erected legally as part of local planning processes. Hunters should check with local government ministries and/or logging companies on gate locations or other restrictions.

First Nations wish to urge hunters to use caution and respect when hunting in traditional territories in the Skeena Region. Please watch for local residents and leave your campsites clean.

» Mule deer hunters are strongly encouraged to submit a front incisor tooth (including the root) and a photograph of the antlers to any Skeena Ministry office [Regional office: 3726 Alfred Avenue, Smithers (drop off tooth - please do not mail)]. A lack of harvest data increases the risk that mule deer seasons will become more restrictive.

» The Nisga'a Government wishes to urge hunters to use caution when hunting in the Nass Valley, because

there may be a large number of people picking mushrooms during the hunting season.

» Access to the Endako Mines and Huckleberry Mines Sites (MU 6-4) is prohibited under the *Mines Act* and *Trespass Act*.

» Hunters should check regional maps for No Shooting and No Hunting Areas that might apply in areas they wish to hunt (pages 51-54). Hunters should note closures in the No Shooting and No Hunting Areas section on page 10.

» Hunters should be aware that the discharge of a firearm is prohibited within 400 m of either side of the road allowance of Granisle Hwy (Hwy 118) between Topley and Granisle (MU 6-8).

» The hunting of all wildlife is prohibited within 2 km of either side of the Muddy Lake/Golden Bear Access Rd (MUs 6-22 and 6-26).

» White and blue (Glacier) colour phases of the black bear are closed to hunting. Note that these animals are rarely pure in colour and are usually somewhat dirty. Hunters should pass up any very light-coloured black bear.

» Lucy Island (in the vicinity of Langara Island, Haida Gwaii) is a Wildlife Sanctuary and hunting, trapping and the discharge of firearms are prohibited (MU 6-13).

» The Teslin Tlingit Council (TTC) is requesting the assistance of hunters to ensure that all parts of wildlife harvested within the Teslin Tlingit Traditional Territory in northern BC (MU 6-25) are used. TTC requests that hunters contact TTC Game Guardians (867-390-2532 ext. 377 or 373) to arrange for sharing portions of any wildlife harvest that would otherwise be left in the field (e.g., heads). Game Guardians, are active in the Traditional Territory, educating the public and promoting safe and respectful hunting. TTC encourages BC hunters to contact the Lands and Resources office prior to beginning your trip.

» The Kaska Nation are requesting the assistance of hunters to ensure that all parts of wildlife harvested within their traditional territories in northern British Columbia (MU 6-23, 6-24, and 6-25) are utilized. The Kaska Nation request that hunters drop off any portions of carcasses they would otherwise leave in the field (e.g., heads) or are willing to share. For further information on culturally sensitive areas, meat sharing, and other initiatives, please find contact info for the Kaska Nation at: [www.kaskadenacouncil.com](http://www.kaskadenacouncil.com)

» Please avoid shooting collared wildlife (See page 11)

## NOTICE TO MOOSE HUNTERS

» There is no open season for moose during the period Sept. 25 to Oct. 10, within 400 m of the shore of and over that portion of Teslin Lake south of the north end of Shaman Lake (also known as Burial Island), and including Shaman Island (MU 6-25). See Map F35.

**Moose hunters are reminded Compulsory Inspections (CI) are required for all moose harvested in the Skeena Region.** The information collected from CI is used to better understand the ages of bull moose harvested and the location information helps us understand the distribution of hunters across the region. For more information on CI for moose in the Skeena Region visit <https://www2.gov.bc.ca/assets/download/7545FE1ABA544717ACDA9E12611BA072>. Note that CI is not a replacement for the Hunter Sample Survey that you may receive in the mail and both sources of information are important for harvest management of moose.

**Over the last few years we have seen declining moose populations and reduced bull:cow ratios across much of the southern portion of the Skeena Region.** To address the issue of low bull:cow ratios the 7-day GOS season was reduced to 3 days in 2018. However we continued to see resident harvest exceed the licensed harvest objectives across most MU's which further contributed to low bull:cow ratios. In 2022 the GOS seasons (bow and any weapon) have been closed for moose in all southern MU's. Only LEH seasons will be available/open there now, which has resulted in more LEH permits being available. MU's 6-01 and 6-02 seasons were not changed as there are multiple management efforts ongoing in the area to contribute to the recovery of the Tweedsmuir caribou herd and reduced moose harvest in the area would be counterproductive to those efforts.

**The traditional territories of 34 First Nations have existed for time immemorial in this area prior to the creation of Wildlife Management Units and licensed hunting.** Hunters are encouraged to learn about the history and culture of the First Nation(s) and their traditional territories that you'll be hunting on. Please respect the land by leaving your campsites clean and free of garbage and avoid using traditional camp sites and cabins (see the notices on the Region 6 map page for Nation specific information and contacts). If you encounter Indigenous land guardians during your travels treat them with respect as they fulfill their duties as stewards of the land and our partners in resource stewardship.
